

Let Vivid 3D Wayfinder to Enhance Visitor's Experience

No more boring 2D static floor map

What is 3D Wayfinder Solution

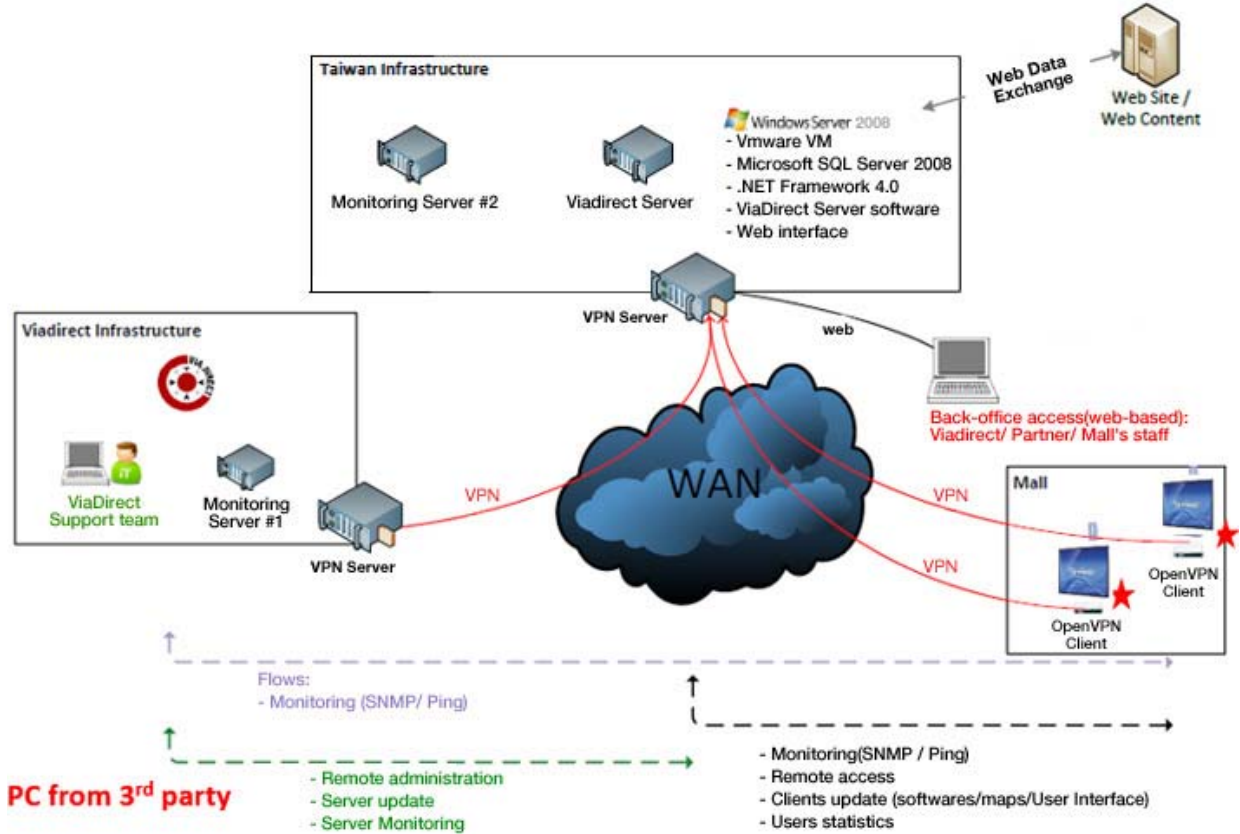

3D Wayfinder is a wayfinding software and service used to help visitors to navigate in large public buildings (shopping centers, airports, train stations, hospitals, universities etc.) 3D Wayfinder uses a 3D floor plans of a building and renders it in real-time. It displays interactive information layers. Software can be used on interactive kiosks or as a mobile application.

What you can do with 3D Wayfinder

Usually a 3D wayfinder system involves below platform to better serve visitors

- Interactive 3D floor map for store direction
- Customer feedback system
- Digital signage for advertisement
- Loyalty card system
- Statistics & Analysis of kiosk

How it works

ViaDirect solution introduction

ViaDirect is primarily a software solution. It runs in a kiosk: the "wayfinding kiosk". The solution is sold with ViaDirect maintenance 24 hours a day, and a web back-office allowing the client to edit himself a number of parameters independently and have access to usage statistics.
